Products Detail

Construction Steel Wire Mesh Row Welding Machine

Feeding mode: coil feeding

The precision weft cutting device and the axial positioning device are provided for wefts to ensure that the wefts are not required to be trimmed due to consistent length and tidy edges.

Welding: full-automatic welding

A power electronic synchronous control technology is adopted, both welding time and branch control welding are formed by a digital integrated circuit, the control accuracy is high, welding sports are firm, and burn marks cannot be formed.

Finished products: flaky meshes, coiled meshes (optional)

Meshes are drawn by an elastic pull rod and a grid positioning device, so that grids are easy to adjust slightly and high in dimensional accuracy, and the apertures of welded meshes can be adjusted at random in a certain range.

Application:

Construction meshes, Shiloh plate meshes, geothermal meshes, seedbed meshes, flower room meshes

Welding wire diameter	1.4-2.5mm	Rated voltage	380V, 420V (customizable)
Welding aperture	50X50-200X200MM	Rated power	Customized
Welding width	1200mm	Dimensions	1.8x2.5x1.8m
Warp quantity	25	Machine weight	3.2t
Welding speed	80times/min
