Products Detail

Sack gabions

Sack gabions are cylindrical unit which are made of double twisted steel woven wire mesh panel 5X7, 6X8, or 8X10cm according to ASTMA975-95 and EN10223-3.

Wire mesh for making of sack gabions is hexagonal opening with the wire diameter of 2.7mm and selvedge wire of 3.4mm diameter.

How to use: Sack gabions filled with stones are used in river control and various emergency works. Sack gabions are supplied with steel reinforcing wires inserted during the manufacturing process to facilitate closing during installation.

Dimensions and sizes of galvanized sack gabions can be customized.
