Products Detail

Wire drawing Machine With A Pulley

Specification:

| | |
|-----------------------------|---|
| Type: | LW 1 -6/550 |
| Description: | LW1-6/550 wire drawing machines, driven by gears, are capable of drawing rod wires of high-,medium-,low-carbon steel,copper,aluminium,ect.and applicable to manufacturing industries such as wood screw,nail, conducting wire rope for electrician use,spring,etc. With electrical control,this kind of machine is safe in operation,low in noise,and high in efficiency. |
| Specifications: | Specifications: Modle: LW1-6/550 Diameter of the spool(mm): 550 Drawing range(mm): 6.5 -2.2 Speed of the spool(rpm):27-168 Power of a single machine(kw): 15-22 Weight (kg): 1400 Overall dimensions(LxWxH): 6050x1685x2100 |
| Auxiliary Equipments | Production molds: |

Fine Wire Wet Drawing Machine:

Specification:

| | |
|------------------------|--|
| Type: | IT-9/315 |
| Description: | This unit is made up of payoff stand, fine wire wet drawing machine,tension device,f400 spool coiler,mainly used to draw shaped brass wires. |
| Specifications: | 1.dia.of the speed lock wheel:f315mm 2.quantity of dies:9 3.dia.of a feeding wire:1.7mm |

- 4. dia.the output wires:1.12×1.12mm, the minimum:0.35×0.35mm
- 5.cumulative reduction:85%
- 6.mean reduction ratio:20%
- 7.drawing speed:300-800m/min
- 8.associated motor (frequency control):YCT-160-4-11kw
- 9.external diemnsion:1500×1000×1000mm (L*W*H)
- 10.weight:1500kg
